

# How to Change OMNIPARTS Pricing

Last Modified on 09/20/2023 10:44 am EDT

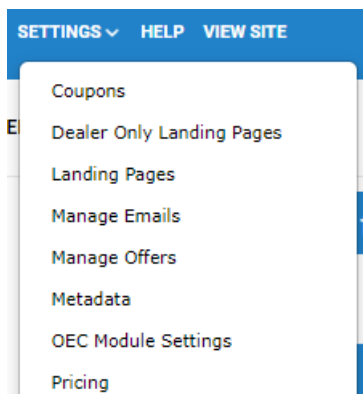

OMNIPARTS Automotive Parts Online allows the Nissan customer to shop for all of the vehicles in their garage. These parts are designed to fit vehicles across a wide spectrum of makes and models, so implementing a competitive pricing strategy with OMNIPARTS can have a fantastic payoff: consumers who purchase these parts benefit not only from Nissan-backed quality that they trust, but from savings as well.

If you'd like to change pricing on Omniparts, you can do so through the SimplePart Control Panel. The process is simple:

- Log in through [NNA net](#)
- Go to the [SimplePart Control Panel](#)
- Choose your dealer url at the top right dropdown menu

- Go to the Settings menu and choose Pricing from the dropdown list

- Click the "ADD NEW" button and to set new pricing sets
